

Metal Yapi

ENVIRONMENT POLICY

Taking the view that quality production cannot be product focused alone, Metal Yapi has identified the environmental effects of its production operations, regulated them and introduced an Environmental Management System.

Metal Yapi actively cultivates environmental awareness among its employees.

We endeavour to pass on our awareness of the environment to our customers, our suppliers and neighbours.

We listen to and take on board the views of all interested parties.

At Metal Yapi, knowing that natural resources aren't infinite...

- we monitor our consumption of natural resources and reduce usage levels wherever possible;
- we manage our waste with a view to preventing pollution before it arises, reducing the polluting effects of our operations, and recycling;
- we monitor and constantly improve our environmental performance;
- we comply with relevant legislation and other requirements;

And we make a commitment to allocate the resources necessary to achieve these goals.

Bülent ÖZGÜL
Chief Executive
